PROJECTS

Implementation of Donation System Using Blockchain

- In this project we going to implement a donation system with blockchain technology. The main goal of our project is we can provide all donation categories in single platform. Such as Blood donation, Cloth donation, Stationary donation, Fund distribution and additional part is Child Adoption. This all implementation with the help blockchain technology. Which is provides security and transparency.

Anti-Sleep Alarm for Driver

- This system alerts the user if he/she false a sleep at the wheel there by avoiding accident and saving lives. This system useful especially for people who travel long distance and people who are driving late night.
